

Precision PMD

PNP Container Placement Systems

Designed and Built to Work...

Precision PMD PNP Container Placement Systems are ideal for DNesting tubs and lids that are less ridged or do not have uniform stacking features which are required by our RC DNester.

Features include

- 304 Stainless Steel Tubular Frame
- Servo Driven
- AB Compactlogix PLC
- AB Kinetix 350
- AB Panelview 7
- Tool-less dis assembly

Options:

- Change Magazines/Heads for different container sizes
- Single to multiple head configurations
- Automatic loading

**Precision PMD Container Placement Systems
can be used over your existing machinery!**

Shown Are Four (4) Precision PMD PNP Container Placement Systems
All shown place three tubs per cycle, two run large tubs, two run small tubs. All tooling is interchangeable.
Each system operates at 100CPM. (depending on configuration)
