

Precision PMD

Designed and Built to Work...

The Roto-Fill 2000 is capable of dispensing IQF, Dry and other free flowing products at rates upwards of 120 packages per minute. This filler consumes less line space than an average person, yet delivers accurate, repetitive fills that you can count on. The Roto-Fill 2000 was designed to mount to virtually any inline packaging system.

Built of Stainless Steel and Food Grade Plastics, the Roto-Fill 2000 is suited for any environment. Wash this system down where it stands. All components are corrosion resistant and manufactured to stringent standards. All food contact parts are removable from the filler without tools.

Features include

- Telescoping Pockets
- Easy Fill Adjustments
- Easy Changeover and *Dis-assembly*
- Servo or Lineshaft Driven*
- Small Footprint
- Optional Portable Frame
- Optional Product Elevator Conveyor

Precision PMD Volumetric Fillers can be used over your existing packaging machine.
